

After I obtained my associates degree, I decided to pursue my Bachelor of Science Degree in Nursing. I chose Schreiner University because of a previous attendance that was a positive experience in 2002-2003 for licensed vocational nursing. At that time the whole process went smoothly and any anxiety I had about attending school was alleviated. The staff and instructors were always courteous and professional. I was hoping when I attending this time my experience would be the same. I have not been disappointed.

I am taking a one year program on line and that can sometimes be overwhelming when you don't have an actual classroom to attend with instructors you see face to face. From the admission process on, again, all fears or concerns have been alleviated by staff that are prompt to address issues. The classes are easy to follow and the instructors have been incredible. Contacting an instructor is never a problem and responses back from them are in a timely manner, sometimes even immediately.

There will always be issues that come up with any class concerning books or the content material as things are always changing, but the instructors really take your education seriously and are willing to go above and beyond to research and correct issues as they arise. I have found them to be friendly, approachable and sincerely caring about the students learning the material and having the best education experience they can.

I would definitely recommend Schreiner University's online Bachelor of Science in Nursing program to anyone who is interested in obtaining a quality education.
